

2013 Cornell New Student Survey

The Cornell New Student Survey asks incoming first-year students about their high school activities; personal goals and abilities; and expectations of their college experience.

This web-based survey was conducted from July 30 to August 23, 2013. All first-time, full-time first-year students at Cornell were invited to respond to the survey. A total of 2,893 students participated in the survey, yielding a response rate of 88%.

The results of the 2013 Cornell New Student Survey are displayed in the tables that follow. It may be most useful to refer to the survey instrument first in order to locate questions of interest.

On the first line of each table, the responses for the applicable survey question are presented for Cornell University as a whole. Frequencies are also presented by sex, race/citizenship, and undergraduate college.

Thinking of your high school graduating class, about how many students went on to a 4-year college or university?
Select the best answer.
