2010 Freshman Survey

The Freshman Survey is a national survey of incoming first-year students conducted by the American Council on Education and the Higher Education Research Institute at UCLA. The survey asks respondents about their high school activities and achievements; personal goals, attitudes and abilities; and expectations of their college experience.

The 2010 Freshman Survey was administered in the fall of 2010 to all incoming first-year students. 2,652 students responded to the survey, yielding an overall response rate of 83%.

The results of the 2010 Freshman Survey are displayed in the tables that follow. It may be most useful to refer to the survey instrument first in order to locate questions of interest. Then, the corresponding tables can be found using the bookmarks (by clicking on the bookmark image to the left) or by using the search function within Adobe Acrobat Reader.

On the first line of each table, the responses for the applicable question on the survey are presented for Cornell University as a whole. The responses for Cornell as a whole are compared to the survey results of students from "peer institutions." In addition, in order to highlight differences within Cornell, frequencies are presented by race/ethnicity, gender and undergraduate college.
